

REMARKS

In response to the Notice of Non-Compliant Amendment, Applicant has now added the Claims that have been withdrawn to this Amendment in order to comply with 37 CFR 1.121. Applicant believe that this Amendment is compliance with the Patent and Trademark Office rules and is in proper form for review by Examiner

In response to the outstanding Office Action mailed April 28, 2006, Applicant has carefully studied this Action and has now amended this application in order to overcome the objections raised by the Examiner.

In particular, Claims 14-20, which are now pending before the Examiner, have been canceled and New Claim 21 has been introduced. Applicant believes that new Claim 21 is distinguishable from the prior art references cited by the Examiner and is in condition for allowance.

For the Examiner's information, Applicant is the owner of U.S. Patent 6,721,500 which issued April 13, 2004 and claims priority from the same application as this pending patent application, namely British Patent Application No. 0201047.8 of January 17, 2002. In this regard, new Claim 21 which has now been introduced into this application is similar in scope to allowed Claim 5 of U.S. Patent 6,721,500 with

the additional provision of the viewing box shown in FIGURES 6-8 of the present invention.

New Claim 21 is distinguishable from the prior art and U.S. Patent 6,721,500 with regard to the arrangement of the reflecting elements relative to the axis of the camera lens and with regard to the features of the viewing box. Arranging the first and second reflecting elements so that their direction of view is at right angles to the axis of the lens enables a compact construction to be obtained and effective three-dimensional visualization of the images that are obtained.

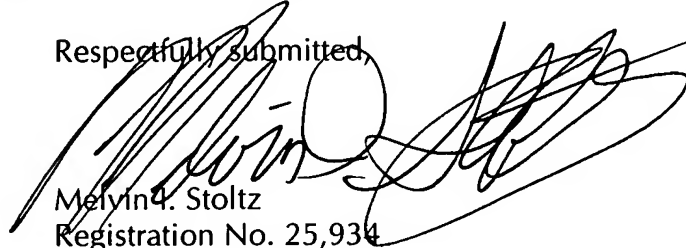

For this reason, Applicant believes that new Claim 21 as now presented has been distinguished from the prior art and is in condition for allowance.

Applicant has also enclosed two replacements sheets of drawings which include the reference numeral for projection screen 44A. Applicant believes these replacement sheets of drawings for FIGURES 7 and 8 overcome the objections raised by the Examiner.

Finally, Applicant has enclosed a request for a second-month extension of time together with the requisite filing fee of \$170.00 for this second month extension of time, extending the time through and including October 1, 2006 within which to file the foregoing Amendment. Any additional fees or credit for overpayment should be made to Deposit Account No. 19-4512.

Of course, if any questions remain, the undersigned Attorney would be pleased to discuss any such questions in a telephone call in order to expedite this matter. For this purpose, Applicant's Attorney has provided his telephone number below.

Respectfully submitted,

A large, stylized handwritten signature in black ink, appearing to read 'Melvin L. Stoltz', is written over the typed name and registration number.
